

Cloud Engineer/Specialist for the Digital Division in Sund & Bælt

Would you like to work with cutting-edge technology and play a central role in the development of our Azure platform? At Sund & Bælt, you will have the opportunity to ensure a stable, secure, and scalable cloud infrastructure that makes a difference both for the company and society. We are looking for an Azure Engineer/Specialist to drive our cloud transformation and work on optimization, automation, security, and governance in close collaboration with a dedicated team.

The Position

As an Azure Engineer/Specialist, you will play a central role in ensuring a robust, secure, and scalable cloud infrastructure.

Responsibilities

- Manage and further develop the Azure platform, including monitoring, maintenance, and ongoing improvements.
- Adapt and optimize existing Azure Landing Zones according to the Microsoft Cloud Adoption Framework and the NIS2 Cybersecurity framework.
- Automate infrastructure and processes using Infrastructure as Code (IaC) – Terraform.
- Implement and maintain security tools such as Azure Defender, Conditional Access, Microsoft Sentinel, and role-based access control (RBAC).
- FinOps (PowerBI and Cost Management) and performance tuning to ensure efficient resource and budget utilization.
- Governance and compliance via Azure Policy, Blueprints, and tagging strategies.
- Collaborate with development teams and external partners on both existing and future projects to ensure the infrastructure adheres to established security principles.
- Participate in the cloud transformation with a focus on innovation, scalability, and future-proof solutions.

Your Background

We expect experience in the operation and administration of Microsoft Azure, including areas such as resource management, network setup, security configuration, and cost optimization. You have worked with Infrastructure as Code and Azure security tools and have knowledge of DevOps principles and CI/CD pipelines (e.g., Azure DevOps or GitHub Actions).

About You

You are structured and analytical, thrive in interdisciplinary collaborations, and can communicate technical solutions to various stakeholders. You are proactive, solution-oriented, and curious about new technology. Flexibility and the ability to adapt to new challenges are essential.

What We Offer

We offer an exciting position working with the latest cloud technology, flexible working conditions, and attractive employee benefits such as professional development, healthcare schemes, and pension plans. You will become part of a professional and dedicated team where knowledge sharing and collaboration are key.

Additional Information

If you have any questions, feel free to contact Michael Kamp Posey at +45 3017 9264 or mipo@sbfdk.
